arkay **dual·dri 150**

**PROFESSIONAL MODEL
TABLE-TOP PRINT DRYER**

The unique, new **Arkay dual-dri 150** is 66% faster than other table-top dryers because of its exclusive internal-external heaters. The **dual-dri 150** has a thermostatically controlled internal drum heater and two external heaters that provides even heat distribution over the entire surface of the copper lined, chrome-plated stainless steel drum.

The **dual-dri 150** is a versatile, high production dryer capable of turning out up to 100 8x10 single weight prints per hour or 50 8x10 double weight or color prints per hour, matte or glossy finish.

Handsomely styled and finished in a silver blue, matte-tone baked enamel, the **dual-dri 150** is quality-built for years of trouble-free service. All controls are on the front at eye-level for easy operation. The **dual-dri 150** has tilt trays that close the front, when dryer is not in use, to keep apron clean and dust free.

So economical to operate and own.
